CENSUS FILE FOR USE WITH HMDA/CRA
2000 DEMOGRAPHICS

- File is for HMDA/CRA processing year: 2004
- Number of records: 68065
- Census tract numbers for the entire nation, Puerto Rico and four Island Areas are represented on this file.
- Census tract numbers are from the 2000 Census Demographics.
- Metropolitan Statistical Area/Metropolitan Division (MSA/MD) definitions are for the edit processing year indicated.
- Small counties are counties with a population of no more than 30,000. Small counties have 999999 in the census tract field and 'S' in the Small County Flag field. The individual tracts are also represented in this file for small counties and are flagged 'S'. Island Area tracts are flagged 'I'.
- If the Demographic Data Flag contains an 'X', the persons/population and/or median family income (tract level) is zero or data were suppressed by the Census bureau for reasons of confidentiality. Island Area tracts contain 'I' in this flag.
- Median incomes within MSA/MD boundaries are the MSA/MD Median Family Incomes. Those median incomes outside of MSA/MDs (MSA/MD=99999) are the Median Family Incomes for non-metro areas of the state.

Instructions on performing edit verifications of MSA/MD /state/county/tract combinations:

- The MSA/MD code will equal 99999 if the state/county/tract falls outside of a Metropolitan Statistical Area/Metropolitan Division.
- Refer to the HMDA or CRA edits to understand the logic of verifying geographic code combinations. The edit logic for HMDA and CRA differ slightly. (The edits may be obtained by calling the HMDA Assistance Line at (202) 452-2016 and/or the CRA Assistance Line at (202) 872-7584. You may also request a copy via electronic mail at hmdahelp@frb.gov and/or crahelp@frb.gov or via Internet at www.ffiec.gov/hmda and/or www.ffiec.gov/cra.)

Notes:

None of the 163 underwater tracts (tract = 000000) are included on this file.

Geographic changes in the 2004 FFIEC Census File:

1. Metropolitan Statistical Areas and Metropolitan Divisions announced by the Office of Management and Budget (OMB) on June 6, 2003 and updated December 2003 replaced previous Metropolitan Statistical Areas and Primary Metropolitan Statistical Areas. MSA/MD replaces the term MA for HMDA and CRA. The following MSA/MD changes are included in the 2004 FFIEC Census File per OMB's December 2003 update:
    - Suffolk County-Nassau County, NY Metropolitan Division (code 44844) was changed to Nassau-Suffolk, NY Metropolitan Division (code 35004)

- Bristol, VA Metropolitan Statistical Area (code 14980) was deleted and its two counties (Bristol city, VA and Washington County, VA) were added to Kingsport-Bristol-Bristol, TN-VA Metropolitan Statistical Area (code 28700)
- Florence, AL Metropolitan Statistical Area (code 22460) was changed to Florence-Muscle Shoals, AL Metropolitan Statistical Area (code 22520)

Refer to http://www.census.gov/population/estimates/metro-city/0312msa.txt and http://www.whitehouse.gov/omb/bulletins/index.html#2004.

2. Broomfield County, CO was added. The Census Bureau will not provide demographics for Broomfield County until the next decennial census. Demographic approximations for Broomfield County were obtained from the 2000 Census demographics for Broomfield city and the 6 tracts that were entirely in Broomfield city when it became Broomfield County(Nov. 2001). All medians except for the HUD estimated median family income are calculated on this file for the 19 tracts in Broomfield County. For the tract listings of the affected counties: Adams, Boulder, Broomfield, Jefferson, and Weld, refer to http://www2.census.gov/geo/tiger/tiger2002/CO/.
3. Clifton Forge, VA was removed as a county-equivalent and included in Alleghany County as a town. Refer to http://www2.census.gov/geo/tiger/tiger2002/VA/ for Alleghany County tract listing.

Summary of 2004 Census counties:

Note: The new total population fields listed above are calculated using census table items from SF1.P014. Refer to the Census website for details.

There are no split tracts in the 2004 FFIEC Census File.

For HMDA purposes, it is optional for a HMDA reporter to code census tract numbers or 'NA' for small counties. If an institution is both a HMDA and CRA reporter, refer to the census tract reporting section in Appendix A of the HMDA Getting It Right Guide.

For CRA purposes, 1998 was the first year that a CRA reporter could code census tracts in any county as 'NA'. This option is used if the business or farm can only provide a Rural Route or P.O. Box for its address and the institution is not able to determine a geocode based on the information provided.

American Samoa, Guam, The Commonwealth of the Northern Mariana Islands, and the Virgin Islands are not valid for HMDA purposes (used for CRA reporting only). Population and housing data for these Island Areas are included for 2004. The Island Areas use different surveys than the U.S.; therefore, population and housing items may come from different census table numbers. The list below shows these items and their corresponding census tables.

APPENDIX

FFIEC Census 2004

(last updated April 2004)

BACKGROUND:

Each decade, the U. S. Census Bureau compiles geographic and demographic data. The Federal Reserve System takes a subset of the data and creates calculated fields where appropriate for HMDA/CRA, Fair Lending, and research use. The resulting FFIEC Census File is used in many areas of the Federal Reserve System and is also made available to the public.

Data Extraction

Data were obtained from Summary File 1 and Summary File 3 DVDs ordered from the U. S. Census Bureau with the corresponding technical documents. The American Fact Finder on the U. S. Census Bureau web site was used to verify both the extracted and calculated fields.

Data for the Island Areas were obtained directly from The American Fact Finder on the U.S. Census Bureau web site.

DEFINITIONS:

Metropolitan Areas

Metropolitan Statistical Areas and Metropolitan Divisions announced by the Office of Management and Budget on June 6, 2003 and updated December 2003 replaced previous Metropolitan Statistical Areas and Primary Metropolitan Statistical Areas. MSA/MD replaces the term MA for HMDA and CRA. Refer to http://www.census.gov/population/estimates/metro-city/0312msa.txt and http://www.whitehouse.gov/omb/bulletins/index.html#2004.

Counties (and Statistically Equivalent Entities)

Each county and statistically equivalent entity defined by the U. S. Census Bureau, is assigned a three-digit Federal Information Processing Standards (FIPS) code that is unique within state. These codes are assigned in alphabetical order of county or county equivalent within state, except for the independent cities, which are assigned codes following the county codes.

The U. S. Census Bureau's web site (www.census.gov Census Geography Reference Resources) has more information on counties.

Small Counties

With the 2000 Census, all counties are tracted. Small counties with no more than 30,000 inhabitants, for purposes of HMDA, are rolled up to the county level and assigned tract number 9999.99. Thus, in the FFIEC Census File, a small county with 12 census

tracts will have 13 tracts with the small county's MSA/MD-State-County combination: 12 census tracts and one small county tract number 9999.99.

County Exceptions

Crawford County, MO –

OMB lists Sullivan City, Crawford County, MO as part of the St. Louis, MO-IL MSA/MD (41180). The Bureau of Census Lists Crawford County, MO as unclassified. HMDA will continue to classify it as non-metro.

Broomfield County, CO

Broomfield County, CO became a county with the 2004 FFIEC Census File. The Census Bureau will not provide demographics for Broomfield County until the next decennial census. Demographic approximations for Broomfield County were obtained from the 2000 Census demographics for Broomfield city and the 6 tracts that were entirely in Broomfield city when it became Broomfield County (Nov. 2001). All medians except for the HUD estimated median family income are calculated on this file for the 19 tracts in Broomfield County. For the tract listings of the affected counties: Adams, Boulder, Broomfield, Jefferson, and Weld, refer to http://www2.census.gov/geo/tiger/tiger2002/CO/.

Clifton Forge, VA

Clifton Forge, VA was removed as a county-equivalent and included in Alleghany County as a town. Refer to http://www2.census.gov/geo/tiger/tiger2002/VA/ for Alleghany County tract listing.

Tracts

Census tracts are small, relatively permanent statistical subdivisions of a county or statistically equivalent entity. The primary purpose of census tracts is to provide a stable set of geographic units for the presentation of decennial census data. This is the first decennial census for which the entire United States is covered by census tracts. The 1990 census had some counties with census tracts and others with Block Numbering Areas (BNAs). For Census 2000, all BNAs were replaced with census tracts, which may or may not represent the same areas.

Census tracts are identified by a four-digit basic number and a two-digit numeric suffix; for example, 6059.02 and 7099.00. In the FFIEC Census File, the tract is six digits with an implied decimal point (e.g. 605902 and 709900).

The U. S. Census Bureau's web site (www.census.gov) has more information on tracts.

Special Tracts

The U. S. Census Bureau reserves the basic census tract numbers 9400.00 to 9499.00 for census tracts delineated within American Indian reservations and off-reservation trust lands that exist in multiple states or counties.

The census tract number 0000.00 identifies underwater tracts. These tracts have not been included on the FFIEC Census File.

Flags

All flags are one-character fields that give information about a tract.

Principal City Flag

The 2000 standards from the Office of Management and Budget (OMB) define metropolitan statistical areas, metropolitan divisions, and principal cities. A principal city is essentially the same as the former central city.

In each MSA/MD, the largest place and, in some cases, one or more additional places are designated as ‘‘principal cities’’ under the official standards. A few MSA/MDs do not have principal cities. The largest principal city and, in some cases, up to two additional principal cities, are included in the title of the MSA/MD; there also are principal cities that are not included in an MSA/MD title. The list of principal cities is provided by OMB. If any part of a tract on the FFIEC Census File is in a principal city, the entire tract is flagged as such. The Principal City Flag field has two possible values: ‘0’ indicates that it is not a principal city tract and ‘1’ indicates that it is a principal city tract.

Small County Flag

For HMDA purposes, the definition of a small county is a county with a total population less than or equal to 30,000. Note: for CRA purposes, the figure is 500,000. The Small County Flag is calculated on the total population of the county in which a tract lies. The Small County Flag has three possible values: ‘T’ indicates a tracted county (non-small county); ‘S’ indicates a small county; and ‘I’ indicates an Island Area.

Split Tract Flag

The 2004 FFIEC Census File does not contain any split tracts; therefore, this flag will always be ‘N’.

Demographic Data Flag

The Demographic Data Flag indicates the presence of demographic data. An “X” in this field indicates that persons/population and/or the tract median family income data are zero or suppressed by the U. S. Census Bureau for reasons of confidentiality. A “D” in this field indicates that the persons/population and the tract median family income are both non-zero. An “I” in this field indicates an Island Area.

Urban/Rural Flag

Census defines Urban ‘U’/Rural ‘R’ for blocks not for tracts. A third designation of Mixed ‘M’ defines a tract containing blocks that are both urban and rural. If a tract contains blocks that are all Urban or all Rural, it is flagged as ‘U’ or ‘R’, respectively. An “I” in this field indicates an Island Area.

Medians

FFIEC-calculated Median Family Income and Median Household Income figures (for both MSA/MD and tract level[1]) differ slightly (less than .2% on average) from the figures published by U.S. Census Bureau for the 2000 census. Because of the switch to MSA/MD in the 2004 FFIEC Census File, values for U.S. MSA/MD Median Family Income and U.S. MSA/MD Median Household Income will be calculated for every MSA/MD because the data is not available from census. The medians for Island Areas are taken directly from The American Fact Finder on the U.S. Census Bureau web site.

Note: In the 2003 FFIEC Census File, there were two special racial categories for which median incomes were calculated for every tract: Asian/Pacific Islander and Combo Other. Because banks will be collecting the new race categories as listed in the Revised Regulation C, these fields have been removed from the 2004 FFIEC Census File.

Calculation of Medians

Two methods are used to calculate medians in the FFIEC Census File: **Pareto interpolation** and **linear interpolation**. Pareto interpolation is used to calculate income medians (median family incomes and median household incomes). Linear interpolation is used for all other types of medians such as median housing age and median person age.

The U. S. Census Bureau's web site (www.census.gov) has more information on interpolation.

Income Level Indicator

Income level indicator identifies each census tract as not available, low, moderate, middle or upper. It is determined from the tract median family income as a percentage of the MSA/MD median family income (tract median family income / MSA/MD median family income).

The codes are:
0 -- **Not Available:** if tract median family income = 0
1 -- **Low:** if tract median family income is > 0% and < 50% of the MSA/MD median family income
2 -- **Moderate:** if tract median family income is >= 50% and < 80% of the MSA/MD median family income
3 -- **Middle:** if tract median family income is >= 80% and < 120% of the MSA/MD median family income
4 -- **Upper:** if tract median family income is >= 120% of the MSA/MD median family income

Puerto Rico/Island Areas

Puerto Rico and the United States had identical surveys for Census 2000. Therefore, all data including minority population are available for Puerto Rico. The

[1] Demographic approximations for Broomfield County, CO were obtained from the 2000 Census demographics for Broomfield city. Therefore, the FFIEC calculated the tract level medians for these tracts in Broomfield and other affected counties.

Island Areas had different surveys. The 2004 FFIEC Census File includes selected demographics for population and housing items.

1-4 Unit Subtotal

The "1-4 unit subtotal" field is derived by adding up all single attached units, single detached units, 2 units, 3 or 4 units, mobile homes, and Boats, RV, vans, etc. Census defines mobile homes, boats, RVs and vans as living quarters occupied as housing units if they are considered a person's permanent residence, and are not used exclusively for recreation.

Numeric Field Width on FFIEC Census File

Eight-character field width is the standard for most numerical values in the FFIEC Census File. This is justified since the largest number represented is approximately 33 million, the population of California.
