

FFIEC Cybersecurity Assessment Tool

June 30, 2015

Agenda

- Risk Trends
- FFIEC Cybersecurity Efforts
- Cybersecurity Assessment Tool

Cyber Risk Trends

Risk Trends

- **Existing vulnerabilities continue to be exploited**

Easily exploitable vulnerabilities persist

- **New platforms create new cyber attack opportunities**

New ways to exploit financial institutions and their customers

- **Lines between cyber actors are blurring**

Commercialization of tools, resources, and infrastructure

Risk Trends

- **Tactics evolve in response to online behavior**

Social networks enable more effective and targeted attacks

- **Trends in malware are evolving**

Destructive malware and cryptographic ransomware

- **Global unrest results in changing motivations**

Regions that either have cyber capabilities or resources to purchase them may turn their focus towards the U.S. financial institutions during political and social unrest.

Risk Trends

Potential Impacts

- Financial
- Operational
- Legal
- Reputational

FFIEC Cybersecurity Efforts

FFIEC Cybersecurity Efforts

- Cybersecurity and Critical Infrastructure Working Group
- Joint statements and alerts
- Cybersecurity awareness website and CEO webinar
- Cybersecurity assessment of community institutions

FFIEC Cybersecurity Efforts

- Issue a Cybersecurity Assessment Tool
- Enhance incident analysis
- Align, update and test crisis management protocols
- Develop training programs for staff
- Update and supplement the *Information Technology Examination Handbook*
- Enhance focus on Technology Service Providers
- Collaborate with law enforcement and intelligence agencies

FFIEC Cybersecurity Assessment Tool

FFIEC Cybersecurity Assessment Tool

Objective

To help institutions identify their risks and determine their cybersecurity maturity.

The Assessment provides institutions with a repeatable and measureable process to inform management of their institution's risks and cybersecurity preparedness.

FFIEC Cybersecurity Assessment Tool

Consistent with the principles in

- *FFIEC Information Technology Examination Handbook (IT Handbook)*
- National Institute of Standards and Technology (NIST) Cybersecurity Framework
- Industry accepted cybersecurity practices

FFIEC Cybersecurity Assessment Tool

Consists of two parts

Part One: Inherent Risk Profile

Part Two: Cybersecurity Maturity

FFIEC Cybersecurity Assessment Tool

Inherent Risk Profile Categories

- Technologies and Connection Types
- Delivery Channels
- Online/Mobile Products and Technology Services
- Organizational Characteristics
- External Threats

FFIEC Cybersecurity Assessment Tool

Inherent Risk Profile Risk Levels

Type, volume, and complexity of operations and threats directed at the institution

FFIEC Cybersecurity Assessment Tool

Inherent Risk Profile Excerpt

Activity, Service or Product	Risk Levels				
	Least	Minimal	Moderate	Significant	Most
Category: Technologies and Connection Types Total number of internet service provider (ISP) connections (including branch connections)	No connections	Minimal complexity (1–20 connections)	Moderate complexity (21–100 connections)	Significant complexity (101–200 connections)	Substantial complexity (>200 connections)
Unsecured external connections, number of connections not users (e.g., file transfer protocol (FTP), Telnet, rlogin)	None	Few instances of unsecured connections (1–5)	Several instances of unsecured connections (6–10)	Significant instances of unsecured connections (11–25)	Substantial instances of unsecured connections (>25)

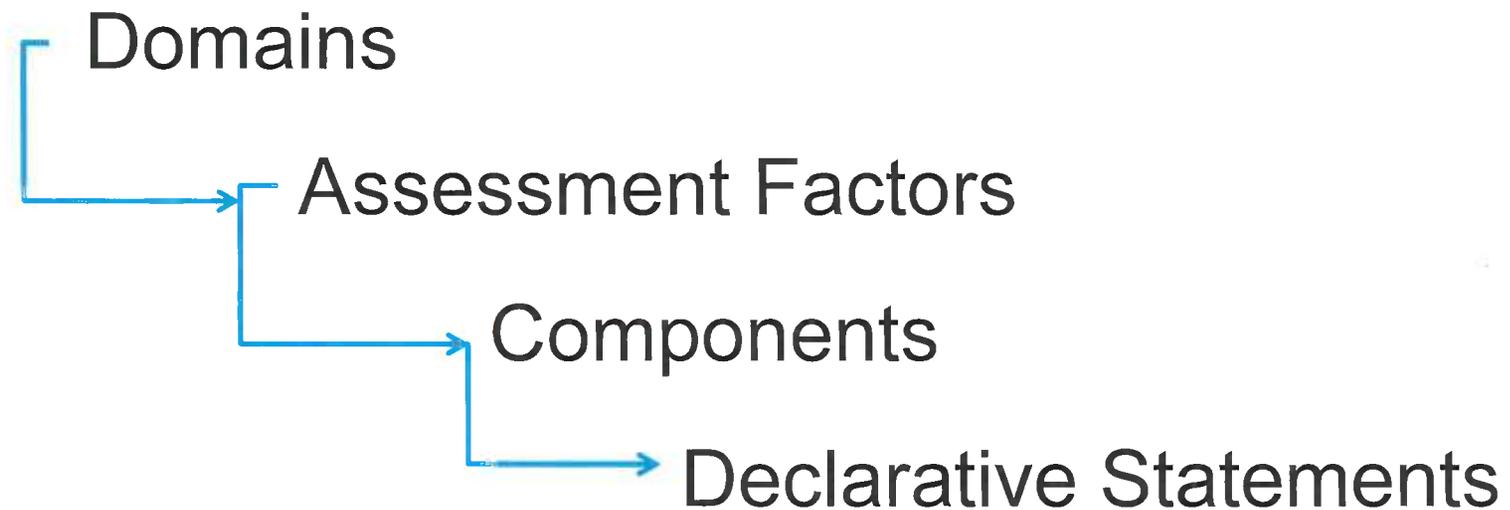

FFIEC Cybersecurity Assessment Tool

Cybersecurity Maturity

- Cyber Risk Management and Oversight
- Threat Intelligence and Collaboration
- Cybersecurity Controls
- External Dependency Management
- Cyber Incident Management and Response

FFIEC Cybersecurity Assessment Tool

Cybersecurity Maturity

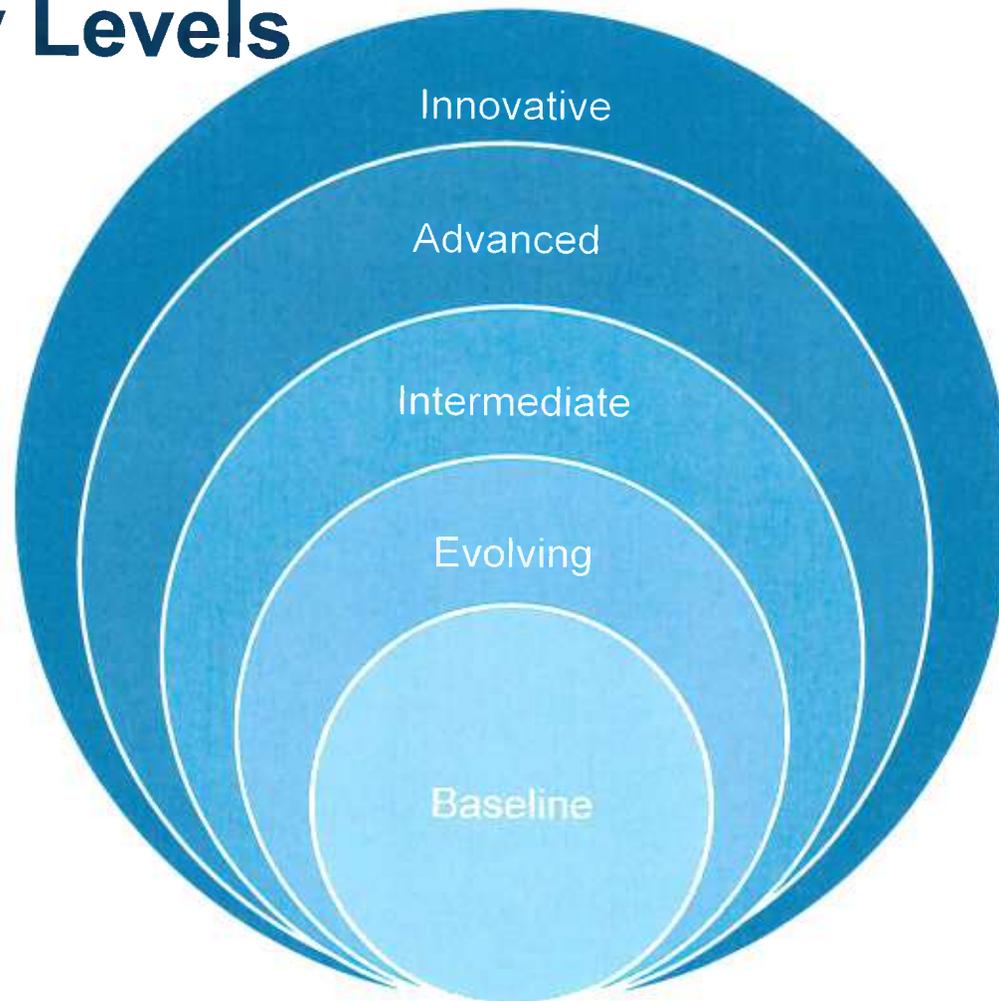

FFIEC Cybersecurity Assessment Tool

Domain	Assessment Factors
1 Cyber Risk Management & Oversight	<ul style="list-style-type: none">• Governance• Risk Management• Resources• Training and Culture
2 Threat Intelligence & Collaboration	<ul style="list-style-type: none">• Intelligence Sourcing• Monitoring and Analyzing• Information Sharing
3 Cybersecurity Controls	<ul style="list-style-type: none">• Preventative Controls• Detective Controls• Corrective Controls
4 External Dependency Management	<ul style="list-style-type: none">• Connections• Relationships Management
5 Cyber Incident Management & Resilience	<ul style="list-style-type: none">• Incident Resilience Planning and Strategy• Detection, Response and Mitigation• Escalation and Reporting

FFIEC Cybersecurity Assessment Tool

Maturity Levels

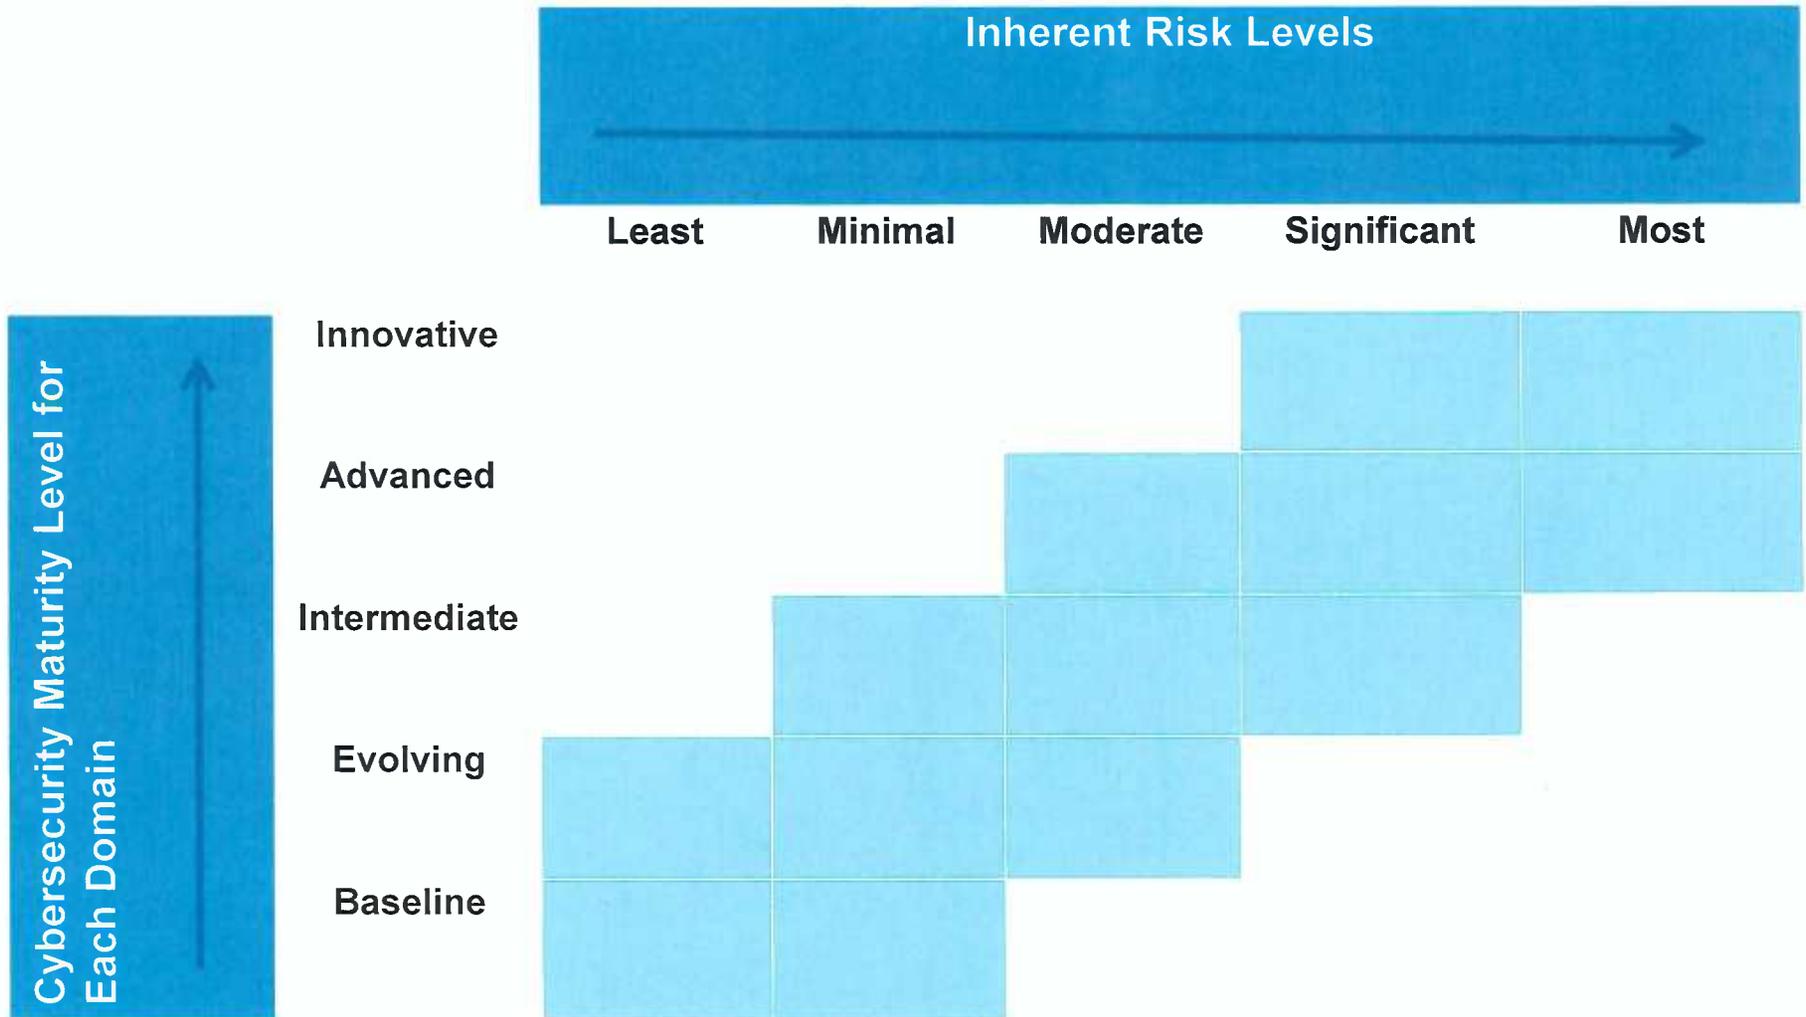

Cybersecurity Assessment Tool

Cybersecurity Maturity Excerpt

Assessment Factor		Domain	Declarative Statement
Domain 1: Cyber Risk Management and Oversight			
Assessment Factor: Governance			
Maturity Level	Baseline	Y, N	
Component	OVERSIGHT		<p>Designated members of management are held accountable by the board or an appropriate board committee for implementing and managing the information security and business continuity programs.</p> <p>Information security risks are discussed in management meetings when prompted by highly visible cyber events or regulatory alerts.</p> <p>Management provides a written report on the overall status of the information security and business continuity programs with the board or an appropriate committee of the board at least annually.</p> <p>Budgeting process includes information security related expenses and tools.</p> <p>Management considers the risks posed by other critical infrastructures (e.g., telecom, energy) to the institution.</p>

FFIEC Cybersecurity Assessment Tool

FFIEC Cybersecurity Assessment Tool

Supporting Materials

- User's Guide
- Overview for CEOs and Boards of Directors
- Appendix A: Mapping Baseline Statements to *FFIEC IT Handbook*
- Appendix B: Mapping Cybersecurity Assessment Tool to the NIST Cybersecurity Framework
- Appendix C: Glossary

FFIEC Cybersecurity Assessment Tool

Benefits to Institutions

- Identifying factors contributing to and determining the institution's overall cyber risk.
- Assessing the institution's cybersecurity preparedness.
- Evaluating whether the institution's cybersecurity preparedness is aligned with its risks.
- Determining risk management practices and controls that could be enhanced and actions that could be taken to achieve the institution's desired state of cyber preparedness.
- Informing risk management strategies.

Thank you
