

## Explanation of the Community Reinvestment Act (CRA) Asset-Size Threshold Change

### Applying the January 1, 2024 CRA Definitions:

For Federal Deposit Insurance Corporation (FDIC)- and Federal Reserve-supervised financial institutions subject to CRA requirements, “small bank” means a bank that, as of December 31 of either of the prior two calendar years, had assets of less than \$1.564 billion.

For FDIC- and Federal Reserve-supervised financial institutions subject to CRA requirements, “intermediate small bank” means a bank with assets of at least \$391 million as of December 31 of both of the prior two calendar years and less than \$1.564 billion as of December 31 of either of the prior two calendar years. Since there is no CRA loan data requirement for an intermediate small bank, its next examination is under the intermediate small bank examination procedures even if that examination comes due during the financial institution’s first year as an intermediate small bank.

FDIC- and Federal Reserve-supervised “large banks” are banks with assets of at least \$1.564 billion as of December 31 of both of the prior two calendar years. Large banks are subject to CRA loan data collection, but cannot be examined under the large bank examination procedures until they have at least one full year of data collected. In addition, any size bank may opt to be examined as a large bank provided that it has collected and reported the required CRA loan data.
