

## Explanation of the Community Reinvestment Act Asset-Size Threshold Change

### Applying the January 1, 2019 CRA Definitions:

"Small institution" means a bank or savings association that, as of December 31 of either of the prior two calendar years, had assets of less than \$1.284 billion.

"Intermediate small institution" means a bank or savings association with assets of at least \$321 million as of December 31 of both of the prior two calendar years and less than \$1.284 billion as of December 31 of either of the prior two calendar years. Since there is no CRA loan data requirement for an intermediate small institution, its next examination is under the intermediate small institution examination procedures even if that examination comes due during the institution's first year as an intermediate small institution.

"Large institutions" are banks or savings associations with assets of at least \$1.284 billion as of December 31 of both of the prior two calendar years. Large institutions are subject to CRA loan data collection, but cannot be examined under the large institution examination procedures until they have at least one full year of data collected. In addition, any size institution may opt to be examined as a large institution provided that it has collected and reported the required CRA loan data.
