Explanation of the Community Reinvestment Act Asset Threshold Change

Applying the January 1, 2014 CRA Definitions:

"Small institution" means a bank that, as of December 31 of either of the prior two calendar years, had assets of less than $1.202 billion.

"Intermediate small institution" means a small institution with assets of at least $300 million as of December 31 of both of the prior two calendar years, and less than $1.202 billion as of December 31 of either of the prior two calendar years. Since there is no CRA loan data requirement for an intermediate small institution, its next examination is under the intermediate small institution examination procedures even if that examination comes due during the institution’s first year as an intermediate small institution.

“Large institutions” have total assets of at least $1.202 billion for December 31 of both of the prior two years. Large institutions are subject to CRA data collection. Thus they cannot be examined under the large institution examination procedures until they have at least one full year of data collected. In addition, any size institution may opt to be examined as a large institution provided it has collected and reported the required CRA loan data.

### History of threshold changes:
