INSTRUCTIONS FOR PREPARATION OF

Report of Assets and Liabilities of a Non-U.S. Branch That Is Managed or Controlled by a U.S. Branch or Agency of a Foreign (Non-U.S.) Bank FFIEC 002S—Supplement

General Instructions

Who Must Report

The Supplement must be completed by any U.S. branch or agency of a foreign (non-U.S.) bank that “manages or controls” a banking branch of its parent bank that is licensed outside the 50 states of the United States or the District of Columbia (hereafter referred to as a “foreign branch”). “Manages or controls” means that a majority of the responsibility for business decisions, including but not limited to decisions with regard to lending or asset management or funding or liability management, or the responsibility for recordkeeping in respect of assets or liabilities for that foreign branch resides at the U.S. branch or agency.

Examples of a need to complete the Supplement would be if: (1) the branch manager for both the U.S. branch or agency and the foreign branch are the same person or there is other significant overlap in personnel; or (2) substantial responsibility for decisions regarding either assets or liabilities of the foreign branch reside with staff in the U.S. office; or (3) recordkeeping systems for either assets or liabilities of the foreign branch are maintained in the U.S. office. The supplement, however, generally need not be completed in respect of foreign branches that maintain full-service facilities, that is, foreign branches that are managed and controlled by staff located at the foreign branch or at locations other than in the United States. Further, the fact that a foreign branch manager may report to a U.S. branch manager pursuant to reporting lines established by the foreign bank will not, by itself, necessitate the completion of the supplement by the U.S. branch.

All U.S. branches and agencies should consider carefully whether the Supplement should be completed. If there are any questions regarding the need to complete form FFIEC 002S, the local Reserve Bank should be contacted. Determinations regarding which U.S. branches or

agencies should complete form FFIEC 002S will be made by the Board of Governors of the Federal Reserve System, in consultation with the Office of the Comptroller of the Currency for federal branches and agencies and with the Federal Deposit Insurance Corporation for insured state-licensed branches. These determinations will be made with reference to where substantive decision-making authority lies.

A separate Supplement must be completed for each applicable foreign branch. No consolidation of statements for multiple branches is permitted.

Supplements shall be filed with the U.S. branch or agency’s FFIEC 002. Please refer to the FFIEC 002 General Instructions, “Where and When to Submit the Report.”

Scope Of The Supplement

The Supplement covers *all* of the foreign branch’s assets and liabilities, regardless of the currency in which they are payable. The Supplement also covers transactions with all entities, both related and nonrelated, regardless of their location.

All due from/due to relationships with related institutions (both depository and nondepository) are to be reported on a gross basis—i.e., without netting due-from and due-to items against each other. This reporting treatment of due to/due from transactions with related institutions parallels the treatment called for in Schedule M of the FFIEC 002, “Due From/Due to Related Institutions in the U.S. and in Foreign Countries.” That is, the gross due from and gross due to items to be reported will include all claims between the foreign branch and any related institutions (whether depository or nondepository) arising in connection with:

- (1) Deposits of any kind.
- (2) Loans and borrowings of any kind.

General Instructions

- (3) Overdrafts, federal funds and repurchase and resale agreements.
- (4) Claims resulting from clearing activities, foreign exchange transactions, bankers acceptance transactions, and other activities.
- (5) Capital flows and contributions.
- (6) Gross unremitted profits and any accounting or regulatory allocation entered on the books of the reporting foreign branch that ultimately affect unremitted profits such as statutory or regulatory capital requirements, reserve accounts, and allowance for possible loan losses.
- (7) Any other transactions or entries resulting in claims between the reporting foreign branch and its head office and other related institutions.

Report Date

Reports are to be prepared as of the close of business on the last calendar day of the quarter (March, June, September, and December).

How To Report

Accounting Basis

The report may be prepared on either an accrual or a cash basis of accounting. The accounting basis used for an individual foreign branch should be consistent from quarter to quarter.

Currency Translation

For some line items, the report distinguishes between transactions denominated in U.S. dollars and transactions denominated in other currencies. However, all items shall be reported in U.S. dollars. Transactions or balances denominated in currencies other than the U.S. dollar shall be converted to U.S. dollar equivalents prior to their incorporation in the report.

If an asset or liability may be paid optionally in either U.S. dollars or in another currency, report that transaction as denominated in U.S. dollars.

Rounding

See the entry for “Rounding” in the General Instructions for preparation of the FFIEC 002.

Negative Entries

Negative entries are not permitted for any item.

Total Assets Must Equal Total Liabilities

In order to report on this form, exchange rates are used to convert non-U.S. currency values into equivalent U.S. dollar values. Changes in those exchange rates may create unrealized gains or unrealized losses. If such a gain or loss is not reflected in, for example, an equity or unremitted profit account on the foreign branch’s own books, there will be a discrepancy between total assets and total liabilities on this report unless an adjustment is made. In such cases, the foreign branch’s liabilities to its parent bank, which would be included in item 11(a), should be increased to reflect unrealized gains and should be reduced to reflect unrealized losses.

General Definitions

Related and Nonrelated Institutions

In certain line items, the Supplement distinguishes between transactions of the reporting foreign branch with *related* and *nonrelated* depository institutions. For purposes of the Supplement, the definition of related depository institution corresponds to that used for the FFIEC 002 itself. Please refer to the entry for “Related Institutions” in the Glossary section of the FFIEC 002 instructions and to the reporting instructions for Schedule M of that report.

U.S. and Non-U.S. Addressees (Domicile)

The Supplement also distinguishes between transactions of the reporting foreign branch with U.S. addressees and non-U.S. addressees.

For related institutions (whether depository or non-depository), the definitions of U.S. and non-U.S. addressees (domicile) correspond to those used for Schedule M of the FFIEC 002. That is, *U.S. addressees* encompasses offices domiciled in the 50 states of the United States and the District of Columbia. *Non-U.S. addressees* encompasses offices domiciled in a foreign country, in Puerto Rico, or in a U.S. territory or possession. For additional information, see the detailed instructions for preparation of Schedule M.

For nonrelated parties, the definitions of U.S. and non-U.S. addressees correspond to those used in the FFIEC 002

General Instructions

for determining the domicile of customers of the respondent. That is, *U.S. addressees* encompasses residents of the 50 states of the United States, the District of Columbia, Puerto Rico, and U.S. territories and possessions. *Non-U.S. addressees* encompasses residents of any foreign country. For additional information, see the entry for “Domicile” in the Glossary section of the FFIEC 002 instructions.

Transactions with International Banking Facilities (IBFs), whether related or nonrelated, are regarded as transactions with U.S. addressees.

Maturities

Several items call for a maturity breakdown between those transactions with maturities of one day or under continuing contract (“overnight”) and those transactions with all other maturities (“term”).

One-day transactions are those that are (1) made on one business day and maturing on the next business day, (2) made on Friday to mature on Monday, or (3) made on the last business day prior to a holiday (for either or both parties to the transaction) that mature on the first business day after the holiday.

A **continuing contract** is a contract or agreement that remains in effect for more than one business day but has no specified maturity and that does not require advance notice of either party to terminate. Such contracts may also be known as rollovers or as open-end agreements.

All other maturities. This maturity category encompasses transactions maturing in more than one business day that are not under continuing contract.

Item Instructions

Both the assets and liabilities sections of the Supplement call for detail by location and type of the other party to the transaction and by whether the transaction is denominated in U.S. or non-U.S. currency.

In addition, for claims on U.S. addressees (other than related depository institutions) denominated in U.S. dollars, detail on type of claim is required. In general, the definitions of the specific types of claims (i.e., portfolio items) called for, and their reporting treatment, correspond to the FFIEC 002 definitions of those items. As appropriate, references to specific FFIEC 002 line items are provided.
